

I greatly benefit from listening to XM Satellite Radio and its traffic and weather channels. I have much enjoyed the nationwide stations for I travel through many markets in a single trip. I am rarely in one area. Having XM allows me to be a safer driver because I do not need to repeatedly search for stations or CD's to play. I was greatly anticipating the local weather and traffic's coming. I travel a lot and it is very nice to be able to hear what is happening before I get there. It allows me to avoid problem travel areas. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
